

# STARMed CaStar 'R' NEXT

Hood without underarm straps for non invasive mechanical ventilation (NIV)

# STARMed CaStar 'R' Next hood for non invasive ventilation (NIV)

## StarMed CaStar R Next

The CaStar R Next is a comfortable, versatile and lightweight patient interface for non invasive mechanical ventilation (NIV) designed to offer an alternative to traditional methods of NIV delivery. The CaStar R Next is well tolerated for extended periods and can reduce the risks associated with both endotracheal intubation and face mask use. It can be used in both semi-recumbent and supine positions providing an ideal option for NIV delivery.

The CaStar R Next has been designed to improve patient-ventilator interaction, by reducing the inspiratory trigger delay and increasing the rate of airway pressurisation, while avoiding the need for underarm straps.

The CaStar R Next may be used for the treatment of a number of respiratory conditions including:

**Pre and post extubation respiratory support, COPD exacerbation, thoracic trauma, asthma, post operative hypoxaemia, cardiogenic and non cardiogenic pulmonary oedema.**

**Reference:** Intensive Care Med. 2013 Spr39(4): 734-8  
*Bench comparative evaluation of a new generation and standard helmet for delivering non-invasive ventilation.*
